

I am a financial consulting advisor with 3 years of experience in an IT consulting agency based in India. I am applying for the Global MBA program offered by the Henley School of Business because I feel it will help me learn the essentials of management and leadership and enable me to take the next step in my professional career.

Currently, I am working as a Financial Consulting Advisor for Technosoft Solutions Private Limited. I am responsible for the design and deployment of Financial Solutions to customers based on the requirement. I have 2 teams of 10 members, in total, directly reporting to me. Over the years, I have handled clients from 5 organizations and successfully completed 7 projects. In my most recent project, I have deployed a financial solution for a big Oil Corporation- Maxell Drills. Along with my team, I was able to deploy a solution which not only satisfied the customer's requirements but also added a few bonus functionalities too. This helped us gather further business with this high profile client. Before beginning my professional career in the software industry, I graduated from the Institute of Finance and Management Ahmadabad with an undergraduate degree in Bachelors of Commerce. The industry-oriented MBA curriculum being offered by the Henley School keenly interests me since I feel it will directly impact my professional efficiency and performance in the workplace. The course components of the Specialized Leadership program are of particular interest to me since I would like to learn how to become a better manager at work. I am also impressed by the quality and quantities of the corporate connect workshops frequently organized for MBA students.

I feel that being a part of this program will give me a chance to interact with some of the brightest and most successful industrialists and entrepreneurs in making. As an undergraduate student, I used to take particular delight in being a part of various institutional clubs and events. I am looking forward to those opportunities once again when I enrol for graduate school. I am a serious student who takes pride in the quality of her work; I also like to push myself to take up new challenges. I feel that being a part of this prestigious program will give me the perfect opportunities to do so. I am a team player who enjoys collaborating with her peers and developing optimized solutions for business problems. As a rather perfectionist person I sometimes tend to get caught up in creating solutions which are more perfect than practical, I hope to use this MBA program to help me understand the business requirements of a customer and expand the business of my employer.

I hope to utilize this program in order to expand my professional horizons and also gather a network of like minded and ambitious business professionals. I am confident in my hope that being a part of this program will enable me to successfully become employed as a senior manager or higher in my workplace.
